Game is freaken Brutal, right up there with They bleed pixels and Super meat boy Deffently a throw back to the nes/GB games. Controls are easy, audio is 8-bit style. and the price is deffently right 1 Hour of gameplay roughly <https://www.youtube.com/watch?v=j5PJpItDLiU>. TL;DR If you're into the aesthetics and challenging platforming with some metroidvania-light exploration elements, then this game is easily worth your time and money. Updated Review: After coming back to beat this game after a break, I've come to the opinion that Juno is much better designed than it needs to be - easily superior to most of the other recent "NES" clones which don't have solid gameplay to back up their retro look. If you quit playing Juno after a few hours, let me encourage you with my experience that the game is much deeper than it first appears and ends quite strongly. Original review: Has some metroidvania elements in that you unlock new areas by acquiring new items and thoroughly exploring already visited levels. It can be much more difficult than the early levels suggest, and a few parts have been quite frustating with slippery feeling controls. But overall the platforming has felt solid and fair, and at this point I think the fun outweighs the frustation to the point where I will try to complete the game. Music is also solid.. This

game is pretty fun, but it is very difficult for me (not that that's a bad thing)..
